-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on _____.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The disclosure is objected to because of the following informalities: Appropriate headings should be used throughout the instant specification. On page 4: line 14, it appears that "beams" should be - - bars - - ; line 19, numeral "19" is used for two different parts of the apparatus. On page 5, line 1, it appears that "10" should be - - 8 - - .

Appropriate correction is required.

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification does not provide support for the aspects of pressure equalizing and labyrinth-like distribution chambers provided on both longitudinal sides of the rectangular nozzle stack (claim 3), and the first passage has two to a maximum of five times greater rectangular cross sections than the subsequent second passage (claim 4).

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1732

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-5, the preamble recites "method and apparatus" and thus, it is not clear if these claims are method claims, or if these claims are apparatus claims (for purposes of examination, these claims have been interpreted to be method claims).

In claim 1, line 6, it is not clear what "the carrier steam" means or refers to.

In claim 6, line 6, "12" and "13" are not screws.

Allowable Subject Matter

6. Claims 1-7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

7. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art references presently of record, alone or in combination, disclose, suggest or teach a steam misting process including the steps of passing the steam through a pressure equalizing chamber and emerging the steam on an entire longitudinal side of a rectangular stack as set forth in independent claim 1, or a misting apparatus including a pressure equalizing chamber and a steam outlet bar

comprising two bars attached by screws as set forth in independent claim 6.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 4,124,666 is equivalent to DE 2630055 cited in the international search report. The Japanese references are cited as being of interest. The remaining references were cited in the international search report.
